Introduction.....	1
Statewide Wage Data	4
Kent County Wage Data	14
New Castle County Wage Data	20
Sussex County Wage Data	28

ACKNOWLEDGEMENTS

This report was produced by the Delaware Department of Labor, the Honorable Harold E. Stafford, Secretary, in the Office of Occupational & Labor Market Information, Edward L. Simon, Acting Director.

It was written by George A. Sharpley Jr., Ph.D., Senior Economist. Kim Johnstone, Crystal Comeger, Michelle Capers, and Marie Purnsley-Smith gathered, coded, and tabulated the survey data. Lyn Anderson helped with layout.

Our sincere thanks go to all the employers who took the time to provide the data; without their support, this publication could not exist.

Please direct comments and suggestions to George Sharpley at: (302) 761-8060 or george.sharpley@state.de.us.

Introduction

The Occupational Employment Statistics (OES) program is a cooperative effort of the U.S. Bureau of Labor Statistics (BLS) and state employment security agencies (in Delaware, the Office of Occupational and Labor Market Information (OOLMI) in the Delaware Department of Labor). As outlined in more detail below, BLS developed the procedures and methodology, while OOLMI conducts the survey and tabulates the responses. A software program developed by the North Carolina State Employment Security Commission is used to produce the wage and employment estimates. This means that these estimates are not official BLS estimates, but in most cases they are identical to the official BLS estimates. When they differ, it is by miniscule amounts. We do not use the official BLS estimates because they are not provided for Sussex or New Castle Counties, only Kent County (because it is a single-county metropolitan statistical area).

The OES program has ordinarily used three years of survey data, in order to increase reliability. Beginning in 2003, data collection was done twice yearly, with half the sample surveyed in the spring and half in the fall. BLS publishes two sets of wage estimates for each year now, one after the spring survey round and another following the fall round. In the interest of reducing confusion, we will continue to publish only one set of wage estimates each year, following the fall survey round. The estimates in this publication come from surveys conducted in October, November, and December of 2000, 2001, and 2002, along with the spring and fall survey data from 2003. Data from the three earlier years are updated to expected 2003 values using national employment cost index factors.

The survey universe is all employers covered by the state Unemployment Insurance program, both private and public. This covers about 90 percent of the state's workers. Self-employed, some non-profit organizations, and most agricultural employees are excluded. All establishments (units) with 250 or more employees are automatically included in the survey, while those with fewer employees are randomly sampled for inclusion in the survey. The smallest units have the lowest probability of selection. Some details are provided below. Data from both survey rounds in 2003 are combined.

Year	Survey Universe		Survey Sample		Usable Response	
	Units	Employment	Units	Employment	Units	Employment
2000	23,211	407,813	1,615	108,366	1,247	77,697
2001	24,134	401,134	1,644	107,446	1,284	80,832
2002	24,321	405,743	846	55,705	687	46,458
2003	27,144	417,680	1,680	131,188	1,348	98,958

Response rates averaged 79 percent over the four years of the survey. Nonresponding units have data imputed to them by means of a hot-deck "nearest neighbor" technique. This method finds the responding establishment (donor) which most closely resembles the nonresponding establishment, based on industry, size class, and area. The donor's data are then imputed to the nonresponding unit. Donors are used only once.

Employers are not asked to supply exact wage rates for their employees. They are requested to indicate how many of their workers within each occupation are earning wages within each of the 12 ranges listed below. Conversion between hourly and annual wages is based on a 40 hour week, 52 week year (2,080 hours per year). Some occupations, for instance teachers, typically work a different schedule. Only annual wages are reported for these occupations. In the wage tables, these are printed in **bold** type. The table below shows the wage ranges used in the 2000 through 2003 wage surveys.

Range	Hourly Wage	Annual Wage
A	Under \$6.75	Under \$14,040
B	\$6.75 to \$8.49	\$14,040 to \$17,679
C	\$8.50 to \$10.74	\$17,680 to \$22,359
D	\$10.75 to \$13.49	\$22,360 to \$28,079
E	\$13.50 to \$16.99	\$28,080 to \$35,359
F	\$17.00 to \$21.49	\$35,360 to \$44,719
G	\$21.50 to \$27.24	\$44,720 to \$56,679
H	\$27.25 to \$34.49	\$56,680 to \$71,759
I	\$34.50 to \$43.74	\$71,760 to \$90,999
J	\$43.75 to \$55.49	\$91,000 to \$115,439
K	\$55.50 to \$69.99	\$115,440 to \$145,599
L	\$70.00 and over	\$145,600 and over

Wages include base rate, cost-of-living allowances, hazardous duty pay, incentive pay (including commissions, piece rates, and production bonuses), tips, longevity pay, on-call pay, and portal-to-portal pay. Not included are back pay, overtime pay, severance pay, shift differentials, premium pay for holidays or weekends, meal and lodging allowances, uniform allowances, non-production bonuses, profit sharing distributions, or stock bonuses.

Although a wide variety of statistics are estimated from the raw data, we publish only five: the employment level (**EMPL**) for all employers in the area (state or county), including those not in the survey; the mean (average) wage (**MEAN**); the median wage (**MED**), which half the workers in an occupation make less than, and the other half more than; and entry-level (**ENTRY**) and experienced (**EXP**) wage rates. **NA** in the employment field means that the employment estimate does not meet publishability standards, but the wage estimates do. When wage estimates do not meet standards, no estimates for the occupation are published.

To determine entry and experienced wage rates, an occupation's wage distribution is divided into thirds. The mean of the lowest third is the entry-level wage rate. The mean of the highest third is the experienced wage rate. This contrasts with previous Delaware wages reports, where we reported the 25th and 75th percentiles as potential proxies for entry-level and experienced wage rates. It is important to note that employers are not requested to supply information on their workers' amount of experience.

Delaware Wages 2003 - Statewide

CODE	JOB TITLE	EMPL	MEAN(\$)	ENTRY(\$)	EXP(\$)	MED(\$)
